## THE POWER OF PURIFYING WATER for drinking purposes

- 200 cubic meter per day of product water suitable for drinking purposes and potable distribution
- Remineralized and disinfected
- Totally automated compact containerized Unit, with remote supervision and automatic CIP (cleaning in place) phase
- With borehole source suction control

## THE BENEFITS:

2 SEPARATED HALF-LINES,  
INDEPENDENTLY MANAGED BY THE CONTROL PANEL  
for major flexibility according to seasonal water request

# LOW ENERGY IMPACT

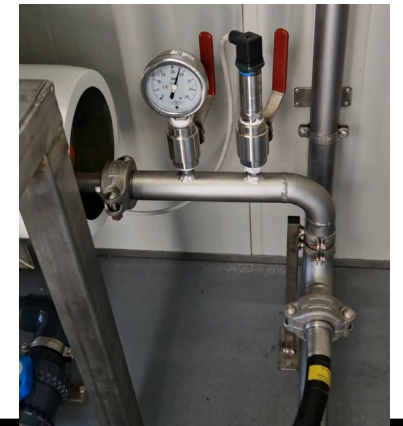

The H-RO200B2 requires 1.81 kWh/m<sup>3</sup> for producing 8.50 m<sup>3</sup>/h of fresh water ready for drinking purposes from high TDS brackish water

# HIGH QUALITY MANUFACTURING

WITH THE BEST AVAILABLE MATERIALS &  
TECHNICAL DEVICES

INCLUDING SPECIAL TOOLS FOR EASE OF  
MAINTENANCE BY LOCAL OPERATORS
